The Changing Workplace and the Future Office

SPR/RICS Cutting Edge Conference
10th February 2015
Organisational drivers

• **Corporate structures:** flatter, more agile organisations; workers who have greater control over their work and work-home balance.

• **Agility and connectivity:** the defining feature of contemporary business and society; redefining how and where work is accomplished.

• **Relationships:** between organisations – both within supply chains and in the competitive arena – taking precedence over the ‘corporate island’.

• **Permeability:** meaning transparency and access whether for colleagues or compliance officers.

• **Knowledge workers:** more independent of ‘place’ and less driven by status, hierarchies and traditional rewards.
Organisational drivers

Organisations are ...

- Leaner and more agile
  - Focused on identifying value from the customer perspective
  - Tuned to dynamic competitive requirements and strategy
  - Less hierarchical in structure and decision authority
  - Less likely to provide lifelong careers and job security
  - Continually reorganising to maintain or gain competitive advantage

Work is more ...

- Cognitively complex
- Team based and collaborative
- Dependent upon social skills
- Dependent upon technological competence
- Time pressured
- Mobile

*Changing Nature of Organisations, Work and Workplace*
Workforce drivers

A multi-generation workforce: Gen Y myth; more older people.
A highly qualified workforce: higher expectations.
Wellbeing in the workplace: for employer and employee.
Wider social change: a more discerning, footloose workforce, higher turnover.

**Changing expectations across generations**
Expectations around choice and flexibility unite them all.
- Working in/outside the office, with ubiquitous connectivity.
- Knowledge sharing, mentoring, collaborating and socialising.
- Good local amenities including coffee shops, leisure and restaurants.
- Nearby leisure facilities – bars, cinemas, sports centres.

The fundamental link is **choice**.
The expectation of choice is increasingly reflected in the workplace; where employers are seeking to provide services to attract staff.
Technology drivers

The ICT has left the building

Enabling agility and mobility

Work/personal use
Consumerisation
Wireless and security
BYOD

Source: Hansen T (2012) *The Future of Knowledge Work*
Technology drivers

Implications for the workplace.

Compliance
Productivity
Design

Speed
Efficiency
Transparency
Integration
Easyness of use
Precision
Simplicity

Emerging office needs

Space as a tool to express culture and values.

From fixed to flexible and on-demand space.

Creating and managing experience.

Less space, used more effectively.

Design for continuous adaptability and diverse usage patterns.

Activity-based spaces.

Provision of amenities and services.
Workplace as corporate expression

Workplaces now conveying corporate values and purpose of organisations.

Aimed at staff and visitors.

Not all about Bean Bags and slides.

Remind staff why they’re there.

Create common, shared purpose.

Making staff more effective.
Workplace as corporate resource

Business support functions working in unison is now a common thread.

The physical workplace not an end in itself.

But part of a continuum of activities that support the overall experience of work.
Workplace for multi work modes

Activity-based spaces

Providing:

Collaboration
Concentration
Communication
Creativity
Confidentiality
Contemplation

Mentoring and learning

Source: Gensler (2012) What We’ve Learned About Focus in the Workplace
Binary relationship between headcount and space is broken. We now have **spaceless growth**.

Now a much wider array of factors.

Example: workstyles now involve utilisation as well as density. Social/meeting space can now account for 40% of NIA.

Space budgets have changed radically.

First, higher densities and utilisation mean less space.

Second, there is more meeting space.

Third more activities take place outside the building.
Workplace: growing complexity

From efficiency to effectiveness.

The question of ‘productivity’.

The futility of property measures.

Influences
An individual's workplace effectiveness is dependent upon four sets of influences

- Organisation
  - Corporate ideals (direction and objectives)
  - Management culture (inclusion, trust)
  - Operational culture (getting things done)
  - Relationship with managers

- People
  - Role and responsibilities (personal control)
  - Personal (experience, training, motivation)
  - Reward (salary and work contract)
  - Work-life (TTW, flexibility, autonomy)
  - External (home life, well being, cost of living)

- Systems
  - Resourcing (people, workload)
  - Team structure/dynamics (formal/informal)
  - Systems (ICT) and internal processes
  - Support for individual/group working

- Place
  - Workstation (ergonomics)
  - Space (layout, social space)
  - Services (facilities, cleaning, security)
  - Environment (temperature, noise, light)
The flexible space market

Fast growing sector. Now accepted.

Diverse sector.

Serviced, managed, co-working.
Flexible space: serviced offices

- Serviced office space in the City has **quadrupled** since 1995.
- **70%** of serviced office space is occupied by SMEs.
- The serviced office market is set to **double** by 2025.
- Half of serviced office space is occupied by stable, steady-state SMEs that don’t expect to grow rapidly.
- **2,250 businesses** based in serviced offices in the City.
- **18,000 people** work in serviced offices in the City.
Flexible space: multi use buildings
Spaces between buildings now as important as the buildings themselves.
Conclusions

The office is a place for connecting people. Despite the huge impact of technology, this continues to be a fundamental truth.
Conclusions

The workforce is more demanding
The generation myth Gen Y debate ignores wider social changes. The office workforce has changing expectations across generations. Expectations around choice and flexibility unites them.

Today’s workforce in the City expects choice at all levels: career development, local retail, work-life balance, leisure and so on.

Workplace design and management is responding to choice and flexibility by providing for continuous adaptability, and delivering experience.

Agile working allows organisations to attract the right talent and manage their real estate with increased flexibility and adaptability.
Conclusions

Emerging office needs
Creating and managing experience.
From fixed to flexible and on-demand space.
Less space, used more effectively.
Space as a tool to express culture and values.
Design for continuous adaptability and diverse usage patterns.
Activity-based spaces.
Use of circulation and atria spaces as a means to facilitate collaboration.
Provision of amenities and services.
